

Week Commencing 20/07/2025

@Jason

Progress on assigned tasks:

I've created a master tracker here for our checklist that we can use prior to submission.

 [BMI2 Group Project](#)

I'm still working through some of the initial tasks I set myself. We need to discuss the analytics dashboard and consider the requirements documentation.

Any blockers or challenges:

Any help needed from others:

I'll need some help from Cecile and Gareth to cover the flows I believe we will need to create.

My plan for the week:

Finalise the Personas based on any feedback

Help Develop Use Case Diagrams with Gareth's overview.

Support with UML Activity Flows

Other:

@Gareth Du Plooy

Progress on assigned tasks:

Created a basic class diagram and researched UML Diagrams and their syntax, layout etc.

Any blockers or challenges:

Challenges I faced were understanding the difference between UML and ERD diagrams. I also struggled to get my head around the basic structure of different components in a UML diagram but managed to clarify this.

Any help needed from others:

I was a little confused by the scope of my role and my responsibilities within the group. I was unsure what diagrams I was responsible for and how to go about tackling them. I asked our PM for help and was assisted promptly.

My plan for the week:

Work through and prioritise the diagrams I am responsible for.
Begin creating first drafts of each flow. and submit them for review.

Other:

@Mark Phillips

Progress on assigned tasks:

Started work on the ERDs - split this out into initial logical grouping due to complexity of the model - added this to Confluence for team review - still work in progress

Any blockers or challenges:

Still awaiting on other artefacts to be able to ensure ERD match workflows and UI wireframes.

Any help needed from others:

None

My plan for the week:

Continue with ERDs review inline with requirements, and other artefacts when available.

Other:

@Cecile Wong

Progress on assigned tasks: I have completed the Admin Panel Flow and the Feedback and Analytics Flow. I'm still working on the UI Mockups.

Any blockers or challenges: This is my second module in this current degree, so the Frontend developer will be a challenge, but I'm eager to refresh and learn HTML, Javascripts and/or CSS.

Any help needed from others: Reviewing the flowcharts.

My plan for the week: Learn HTML, Javascript and/or CSS. Revise Admin Panel Flowchart.

Other:

@Jamie Pointon

Progress on assigned tasks:

Any blockers or challenges:

Any help needed from others:

My plan for the week:

Other:

@Susie Heaton

Progress on assigned tasks:

Ongoing work exploring the possibility of interacting with third party services for things such as security, payment, notifications, and data extraction and reporting. Expected to complete this by end of week with no concerns or blockers.

Any blockers or challenges:

None

Any help needed from others:

Review of final document and feedback (Achieved via Teams)

My plan for the week:

Complete third party services work.

Other:

**Update. Third Party explorative report complete and shared with team. Feedback received.
